

```
#include<stdio.h>
int main(){
    // Write a C program to calculate and print electricity bill for consumer

    int current, previous,total;
    float bill;

    printf("Enter current meter readings :");
    scanf("%d", &current);

    printf("Enter previous meter readings :");
    scanf("%d", &previous);

    total = current - previous ;

    bill = 3.75*total;

    printf("Bill is %0.2f \n", bill);

    return 0;
}
```
